ABOUT T.E.E.M.S. AMERICORPS

In 2012, Georgia’s graduation rate was ranked 48 in the nation. Today in 2015, Atlanta’s urban students still lag behind in terms of STEM performance.

It is our mission at the Alonzo A. Crim Center for Urban Educational Excellence to optimize the life opportunities of children and families in urban communities by ensuring the availability of a prosperous and equitable school environment. We believe that through our work we can create a world where all children have equal access to educational opportunities that prepare them to be academically excellent, culturally competent, and critically conscious.

The Alonzo Crim Center and AmeriCorps collaborated to develop comprehensive school day and after school programming for middle and high schools known as T.E.E.M.S. (Technology, Engineering, Environment, Math and Science). AmeriCorps members recruited for this program are mathematics and science majors/degrees and are trained in “Best Practices in Urban Education”, which includes effective tutoring and mentoring.

In the summer, T.E.E.M.S. AmeriCorps members run the D.R.E.A.M.S. (Developing Relationships to Enhance All Mentee’s Success) Summer Institute. D.R.E.A.M.S. is a summer program that supports urban youth’s transformation into scholars. Each year, our program works to provide high quality academic and social support to 40 metro-Atlanta students invited to participate in our program, their parents and their families. During the programs’ seven weeks, T.E.E.M.S. AmeriCorps members, community organizations, speakers and volunteers dedicate time and/or resources to teach, guide and mentor our urban youth to prepare them for a successful future inside and outside of the classroom.
